DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of treating obesity, classified in class 514, subclass 169+.
 - II. Claims 6, 7, 15 and 16, drawn to a pharmaceutical composition, classified in class 514, subclass 169+.
 - III. Claims 8-10 and 17-21, drawn to a method of screening compounds, classified in class 552, subclass 500+.
 - IV. Claims 11-14, drawn to a method of reduction of serum lipoprotein, classified in class 514, subclass 169+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I (III/IV) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product (see Inventions I, III and IV).

3. Inventions I, III and IV are unrelated for the following reasons: (a) Inventions I and IV are drawn to different methods of using the claimed composition and, thus, have different effects and (b) Invention III is a screening method which is unrelated to the claimed methods of use because it has a different function.

4. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, from under the elected Group for search purposes, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1616

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Telephone Inquiry

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara P. Badio, Ph.D. whose telephone number is 703-308-4595. The examiner can normally be reached on M-F from 7:30am-4pm.
